

Capture Their Imaginations: Science Through Stories, Films and Poetry

21 May 2018 - 9:15 - 16:00

For our full programme visit: www.keele.ac.uk/kslc/keelecpdprogrammes

Overview:

Films, stories and poetry are an excellent way to engage children in science. Could your children spot the carnivores from the herbivores in Zoomania? Would they be able to help Superworm escape from the evil lizard? Perhaps they could work out what makes the shadow bigger in Michael Rosen's poem The Shadow. Maybe they know how to change the Beast back into a prince? We will explore all sorts of exciting ways to teach science using children's favourite films, books and poems. We will also look at other cross-curricular connections during the course of the day.

Learning Outcomes:

As a result of this course, you will be able to:

- To know when and how to make accurate assessments of children's attainment in science and track their progress.
- To understand what is meant by evidence of attainment and how to moderate judgements
- To leave with practical support activities, ideas and materials matched to the current national curriculum for primary science.

Details:

Course code: KC17743

Cost: £150 + VAT

Venue: Sustainability Hub, Keele University,
ST5 5AA
